Summary

- **Hardware–Software Interaction Design**: LLed the interaction redesign of a smart hardware OS, designing interaction logic and state feedback around hardware inputs. Post-launch, monthly usage time rose 51% and satisfaction 11%.
- **AI Application & Rapid Validation**: Continuously exploring AI tools in design practice; proficient in using Claude, Codex, v0 and more to turn product concepts into interactive demos quickly (see AI Labs in portfolio).
- **0→1 End-to-End Design with Business Insight**: Delivered multiple products from scratch as the sole designer, including a Shopify app and the Shambolo app, both with admin backends. Background in business roles helps translate business needs into actionable designs.

Education

National Taiwan Normal University — Early Childhood Education — Sep 2010 - Jun 2014

Experience

Independent UX/UI Designer — Nov 2025 - Present

Freelance · Brand Website · Mobile · Admin

- **FIZO Brand Website (0→1, Live):** Led end-to-end UX for a US/EU 3D-printed footwear brand, from competitive analysis and IA to user flows and prototypes, clearly communicating the value of custom 3D-printed shoes to global users.
- **Shambolo (Mobile App + Admin):** Designed the consumer app and merchant admin for a Shanghai city-experience platform for international visitors. Built around trust, with merchant verification and cultural guides that help visitors explore with confidence and local businesses get discovered.
- **AI-Driven Design Workflow**: Rebuilt the traditional design process with AI: competitive analysis and personas in research, AI-generated interactive prototypes for fast validation, then refined into high-fidelity designs. Cut design cycles by 40–50%.

JMGO — UX Designer — Apr 2023 - Sep 2025

B2C · Intelligent hardware · UX design · Mobile

- **Major OS Upgrade:** Led interaction design for a major Bonfire OS release, from requirements and user research to launch. Monthly usage time rose 51% and OS satisfaction 11%.
- **Hardware–Software Interaction:** Designed OS and mobile interactions for hardware products in domestic and global markets, adapting interaction logic and state feedback to hardware inputs and usage scenarios for a seamless experience.
- **Design system**: Established interaction guidelines and component patterns for large-screen devices, co-building the design system with the visual team to improve consistency across releases.
- **Cross-Departmental Collaboration**: Worked closely with product, software, hardware, and sales teams; presented design proposals regularly to the CPO to drive complex initiatives forward.

Navy Fab — UX/UI Designer — Aug 2022 - Mar 2023

Agency · Shopify · Web design · Product design

- **Web design**: Conducted UI/UX analysis, proposed solutions, and created wireframes and mockups. Boosted a client's website conversion rate by 140%.
- **Product Design**: As the first and only UX/UI designer in the company, I'm responsible for end-to-end UX/UI design, from problem definition to final design delivery.

D2 Nova — Sales Representative — Mar 2019 - Apr 2022

B2B · EVOX · Cloud communication products

- **Pain Point Analysis**: Analyzed common pain points and suggested solutions for 400 clients, including companies, hotels, schools, clinics, and restaurants.
- **Cross-Departmental Collaboration**: Collaborated with technical department to ensure a smooth onboarding experience and understanding of customer needs.
- **Process Planning**: Planned processes and built customer service systems from scratch, achieving a 95% call answering rate.

Forerunner Christian Church — Art Designer/Planner — May 2017 - Jan 2019

Church · California

- **Event Planning**: Planned and managed church events, including workshops, holidays, and lectures.
- **Art Design**: Designed promotional materials with a fresh and lively style.
- **Cross-Departmental Collaboration**: Collaborated with team members and other departments.

White Factor — Sales Specialist — Sep 2015 - May 2017

Antibacterial & Skincare Products

- **Channel Strategy:** Negotiated partnerships with major e-commerce platforms and tailored marketing campaigns to distinct audience demographics.
- **Data Analysis:** Monitored sales targets and delivered performance reports, driving a steady month-over-month (MoM) growth of 3–5%.

Skills & Tools

Skills

UX design	Research · Ideation · User flow · IA · Wireframes · Prototypes · User testing
UI design	Mockups · Design system · Motion design
Coding	HTML · CSS · Vibe coding

Tools & Softwares
